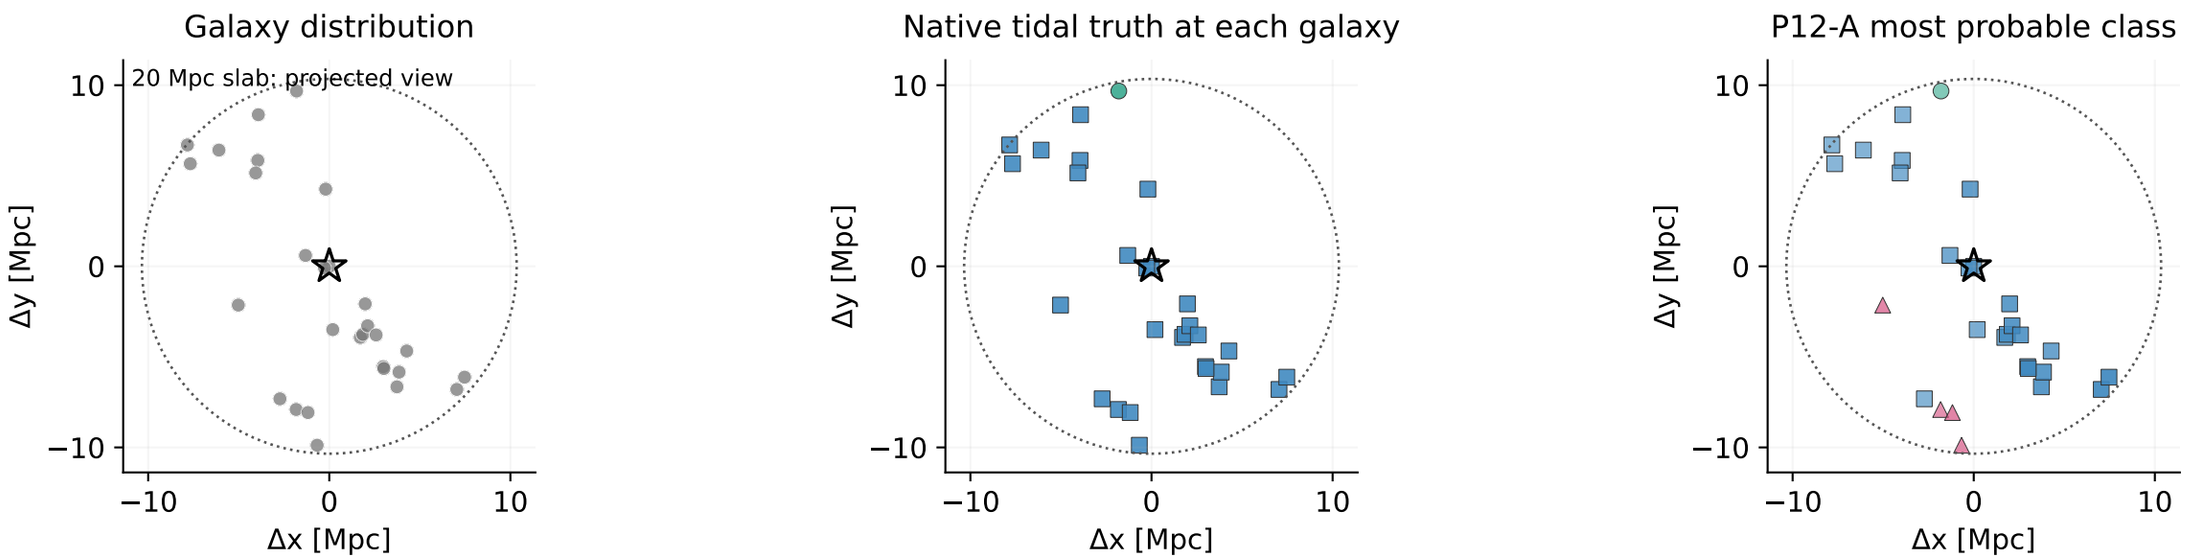
True wall with a string-like tracer neighbourhood

ph006 development mock · target 6032112 · frozen R = 7 Mpc/h

Void · Wall · Filament · Cluster · Unavailable · Central galaxy



Full 3D neighbourhood at R
N = 17 (excluding centre)
L / P / S = 0.66 / 0.27 / 0.06
Line-dominated tracer covariance

Same galaxies across columns in each row

Observed redshift-space coordinates. Top: 20 Mpc slab within projected radius R. Middle: full 3D sphere of radius R.
Dotted circles mark R; dashed lines mark slab boundaries. Prediction opacity increases with confidence; colours show argmax, not certainty.

Median parent ID within each predeclared category; illustrative cases, not prevalence estimates. Native host labels are not a displayed matter field.
