

Current: 221,659 SUPPORTED, uniquely CIGALE-matched Bright galaxies; old: 7,378 matched saved-GAT galaxies.
Old masses shown on the same CG15 scale, but its historical selection used FastSpecFit: no exact CG15 mass box is implied.
Curves use the faintest 20% before any stellar-mass cut. No extrapolation below z=0.15 or beyond z=0.55.
