Inferred cluster − void contrasts · Loa 0.15 ≤ z < 0.20 · log₁₀ M★ ≥ 10.60
Within-colour mass/redshift control; mass panel controls z only · conditional 95% sky-block intervals
Quenched fraction [percentage points]
Mean log₁₀ stellar mass [M⊙]
Mean log₁₀ sSFR [yr⁻¹; floor −14]
Mean log₁₀ SFR [M⊙/yr; floor −14]
Observed g − r [mag]
Mean log₁₀ fitted age [Gyr]
Fitted dust Aᵥ [mag]
Fitted AGN contribution
Red
Blue
Different red/blue support: these are within-population associations, not a matched comparison of colour effects.
