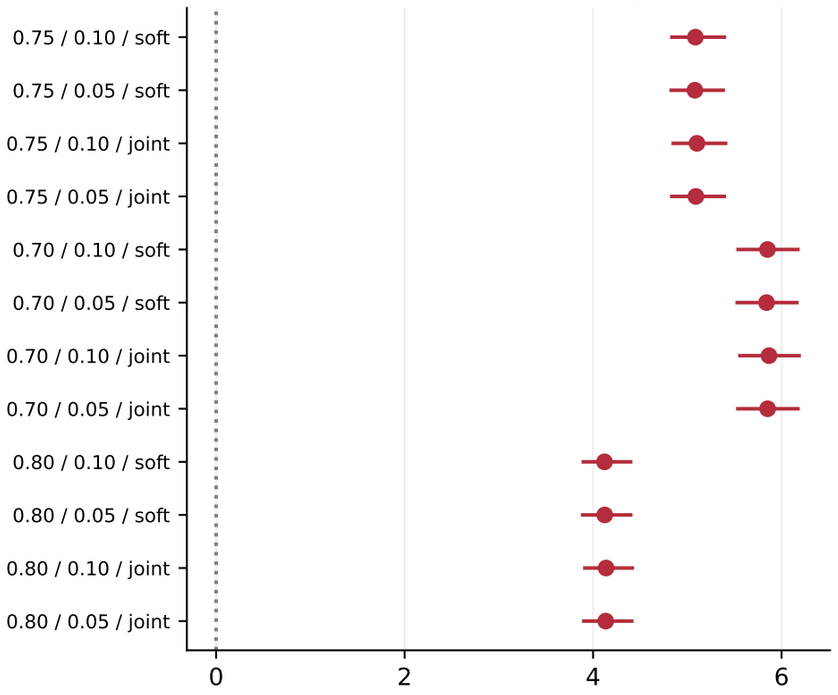
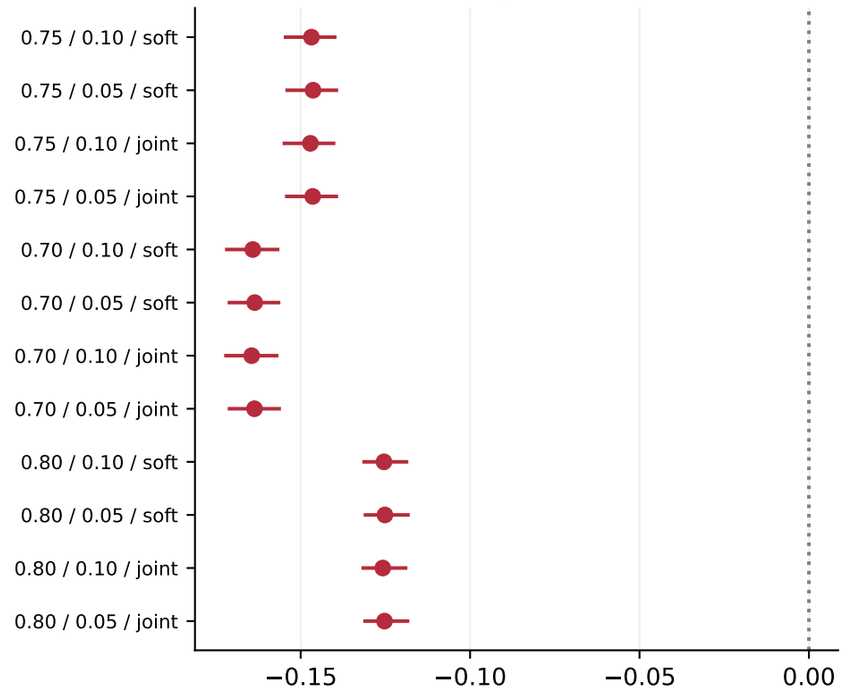
Rest-frame cluster − void contrasts · 0.20 ≤ z < 0.30
Sensitivity: colour boundary / mass-cell width [dex] / support mode · conditional 95% intervals

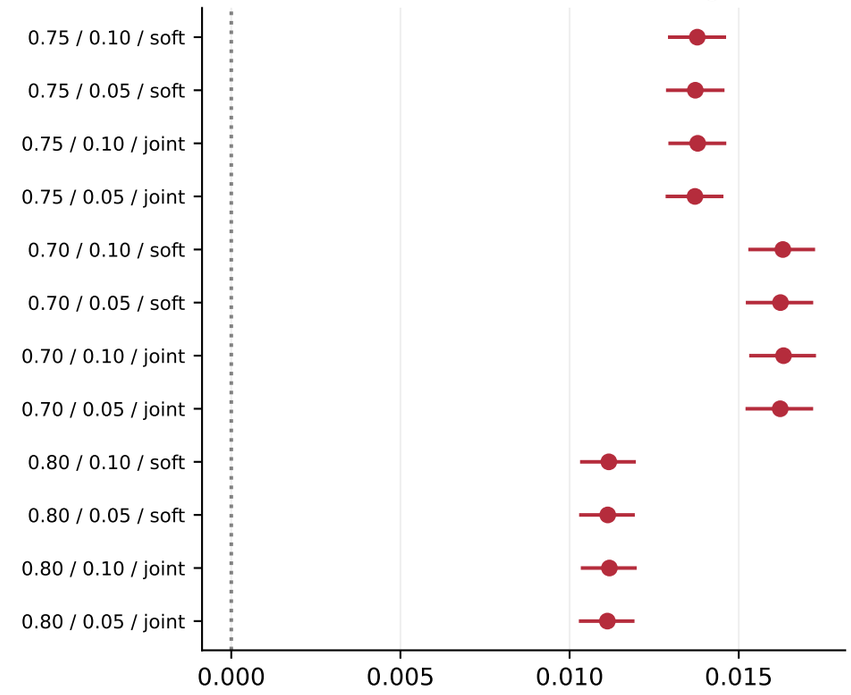
Red · Δ quenched [percentage points]



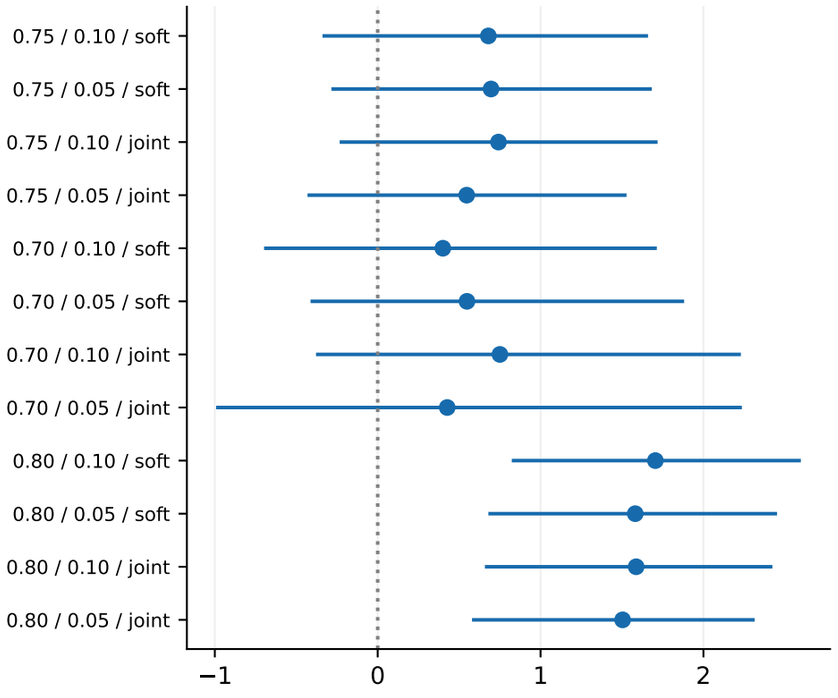
Red · Δ log sSFR [dex]



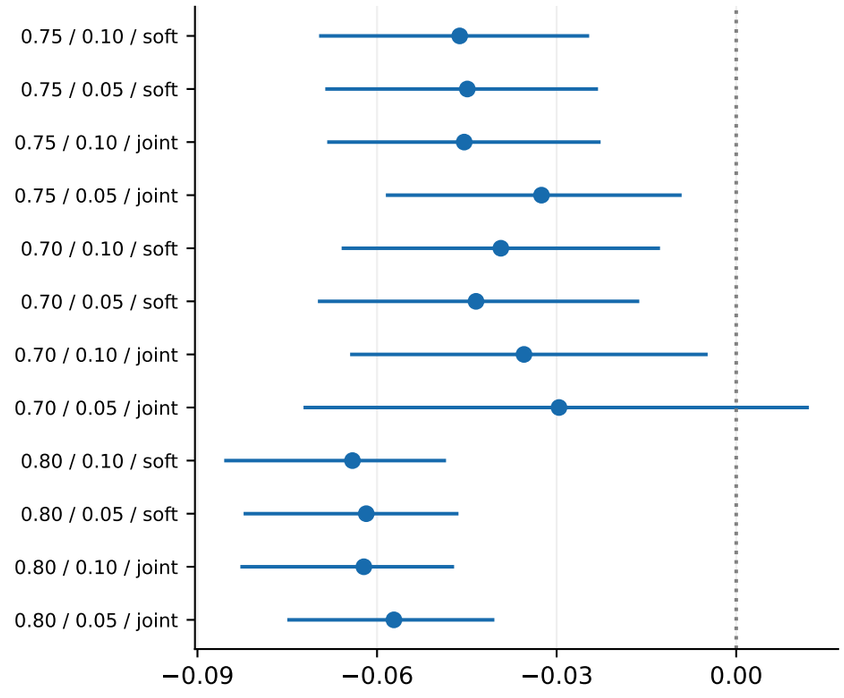
Red · Δ rest-frame colour [mag]



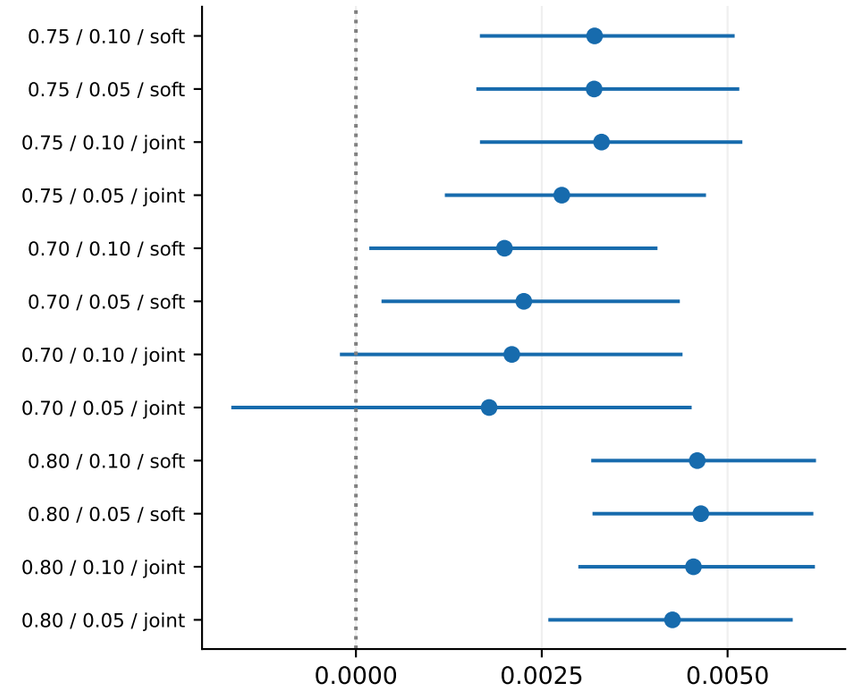
Blue · Δ quenched [percentage points]



Blue · Δ log sSFR [dex]



Blue · Δ rest-frame colour [mag]



Joint means soft + hard common support; plotted estimate remains soft. All variants use the same audited mass cut.
